**COMMENTS FROM  
OUR GOVERNOR**

August 31, 2016

Welcome to the 2016 edition of the Montana Agricultural Statistics. Agriculture is one of the most important industries in Montana; it's also one of the most challenging. Low commodity prices and unpredictable weather have made things tough for many folks, but Montana's farmers and ranchers continue to innovate and push forward. Whether it's diversifying into pulse crops, or taking new "Grown in Montana" products directly to the consumer, Montana's farmers and ranchers are a resilient bunch.

We continue to lead the nation in pulse production and are proud to be a leader in the highest quality wheat, barley and beef genetics. We will continue to promote research and development so that we can efficiently and effectively raise yields and reduce operating expenses. As new technologies are developed, you can bet that Montana's farmers and ranchers will be at the forefront.

Thanks to all our farmers and ranchers for the work they do to feed the world. If you have ideas or suggestions for agriculture development or business opportunities, feel free to send me a note on the [www.governor.mt.gov](http://www.governor.mt.gov) website, or give my office a call at (406) 444-3111. I look forward to hearing from you.

Sincerely,

**MESSAGE FROM  
THE DIRECTOR**

Agriculture is the backbone of Montana’s economy. Despite the current climate of low prices, high operating costs, and extreme weather, Montana’s producers are continuing to grow through careful planning and sustainable farming and ranching practices.

Montana continues to be the leading producer of dry peas and lentils, good rotational crops that have helped our already high-quality wheat. Beef, barley, sugar beets, seed potatoes, canola and organics are some of the commodities that continue to be vital components of our agriculture industry. The high quality agriculture products grown and produced in Montana continue to be the foundation of our state’s economy and rural communities.

At the Montana Department of Agriculture (MDA), we are always looking for ways to promote and advance agriculture. We are reaching out to folks across the state to find out what they need and how MDA can help them accomplish their goals and reach new markets. Whether it’s through grant funds or direct technical assistance, MDA is working hard on behalf of Montana’s producers and consumers.

If you have an idea, don’t hesitate to contact the department at [agr@mt.gov](mailto:agr@mt.gov) or call (406) 444-3144. Updates to this annual Montana Agricultural Statistics bulletin, produced in cooperation with the National Agricultural Statistics Service, are available electronically at [www.nass.usda.gov/mt](http://www.nass.usda.gov/mt).

Ron de Yong, Director, Montana Department of Agriculture

I proudly introduce the 53<sup>th</sup> edition of the Montana Agricultural Statistics Bulletin. This publication is the culmination of a year’s worth of data collection and analysis. While this book is filled with interesting facts and figures, it also contains the story of Montana Agriculture. Many producers volunteered their time and information to give the most current picture of the health of agricultural community.

I was recently asked how this data affects them and what benefits are gained from reporting. The first reply is that NASS publications are the foundation for most Government programs, private institutional lending, and private business planning. We talk to many agricultural businesses monthly answering questions and helping them develop business plans to serve the agricultural community. FSA uses County Estimates data for the basis for the ARC and PLC payments, and other disaster payment programs. MSU uses the data to ask for funding grants and to help bolster some of their programs. Pulse crops continue to grow in popularity and acreage and as they have grown, so has interest in pulse data. These are just a few examples of how the data impacts the individual grower.

USDA National Agricultural Statistics Service (NASS) works cooperatively with many partners with many organizations across the state. Using this cooperative agreement gives NASS the ability to achieve the goal of providing timely, accurate, and useful statistics in service to U.S. agriculture. NASS works closely with other federal agencies, the State of Montana, and farm commodity groups in order to produce the best product possible.

Thank you to all of Montana’s farmers, ranchers, and agribusinesses that made this publication possible. Thank you to all the producers and commodity groups that I have the opportunity to meet, work, and socialize with throughout the year. I would also like to recognize National Association of State Departments of Agriculture employees across the state and the NASS staff (current and retired) for everything you do to make this publication possible.

**NOTES FROM THE  
STATE STATISTICIAN**

**Department Mission**

*"To protect producers and consumers and to enhance and develop agriculture and allied industries."*

**Director: Ron de Yong, (406) 444-3144**

Deputy Director: Kim Mangold

Central Services Administrator: Libbi H. Lovshin

Chief Legal Counsel: Cort Jensen

Communications Officer: Andy Fjeseth

**Department Programs & Background**

Montana Department of Agriculture operates some 30 programs, many funded entirely through user fees. These include regulatory programs that protect producers, consumers and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums, and works to make the department's programs accessible to the public.

**Agricultural Development Division**

Administrator: Kim Mangold, (406) 444-5406

- Federally Licensed Grain Inspection

**Marketing assistance** programs during FY 2015 assisted 37 companies develop and market their products, contributed about \$60,000 in trade show sales, and facilitated \$1,000,000 in sales from export trade activities.

**Growth Through Agriculture** grants and loans during FY 2015 totaled more than \$592,000 to 29 businesses and individuals for value-added agriculture projects.

**State Hail Insurance** insured 1 million acres in 2015. The program insured nearly \$69.8 million in crop value.

**Rural Development** finance programs have a combined loan portfolio of more than \$3.9 million.

**State Grain Laboratory** completed nearly 37,000 tests for grade, protein, germination, baking qualities, vomitoxin and other characteristics on wheat, barley and 20 other commodities, including more than 3,000 inspections on peas, beans and lentils. The Great Falls facility is the only federally licensed grain lab in Montana. A branch office is situated in Plentywood.

**Wheat & Barley Committee** annually hosts an average of 13 foreign trade delegations and 60 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

**Food and Agriculture Development Centers** assisted clients with regional food and farm-derived energy projects, helping to introduce new products, start new businesses and assist business expansions.

<sup>1/</sup> Farms are places that had or would have had annual sales of agricultural products of \$1,000 or more.

## Agriculture Remains Montana's Number One Industry in 2015

A comparison of selected Montana industries shows Agriculture continues to outpace all other industry sectors, although all sectors saw decreased activity. The 2015 value of crop production decreased to \$1.8 billion, a decrease of \$403.0 million or 18 percent below 2014. The value of livestock decreased in 2015 to \$2.2 billion, down \$15.6 million from 2014.

When comparing major industrial sectors in Montana, receipts were down compared to a year ago. Agriculture showed an 8 percent decrease, down \$391.1 million from 2014. Mining showed a 17 percent decrease, down \$265.4 million from the previous year. Gas & Oil showed a decrease of 53 percent, down \$1,390.3 million from 2014. Non-residential Travel showed an increase of 2 percent in 2015, up \$532.2 million from 2014. Wood and Paper Products also saw a decrease from 2014, and was down 4 percent or \$24 million.

<sup>1/</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. <sup>2/</sup> Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. <sup>3/</sup> Sheep and Lambs moved to miscellaneous livestock beginning in 2010. <sup>4/</sup> Details may not add due to rounding. 1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. 2/ No longer published. -- Not available.
